IDEATION PHASE

Brain storming :

Date	24 February 2026
Team ID	LTVIP2026TMIDS36517
Project Name	heritage treasures: an in-depth analysis of unesco world heritage sites in tableau
Marks	4 Marks

Brainstorm & Idea Prioritization Template :

World Heritage Sites recognized by UNESCO are globally significant cultural and natural assets. However, the available data is scattered, complex, and presented in static formats, making it difficult for researchers, policymakers, and tourism planners to identify trends, compare regions, analyze endangered sites, and make informed, data-driven decisions.

There is a need for an interactive Tableau dashboard that transforms raw heritage data into clear, visual, and actionable insights.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

In this step, our team members came together and discussed ideas for the Heritage Treasures project. Everyone shared their thoughts on how to analyze information about UNESCO World Heritage Sites.

After discussing different ideas, we worked together and selected a clear problem statement for the project.

Problem Statement:

To analyze and visualize the distribution and types of UNESCO World Heritage Sites using Tableau.

This helps people understand the importance of heritage sites and the need to protect them.

Step-2: Brainstorm, Idea Listing and Grouping

In this step, our team discussed different ideas for the Heritage Treasures project. Everyone shared their suggestions about how to analyze and present information about UNESCO World Heritage Sites using Tableau.

First, we listed all the ideas without judging them. After that, we grouped similar ideas together to make them easier to understand.

Ideas Listed:

World map of heritage sites

Country-wise number of sites

Region-wise distribution

Cultural, Natural, and Mixed site analysis

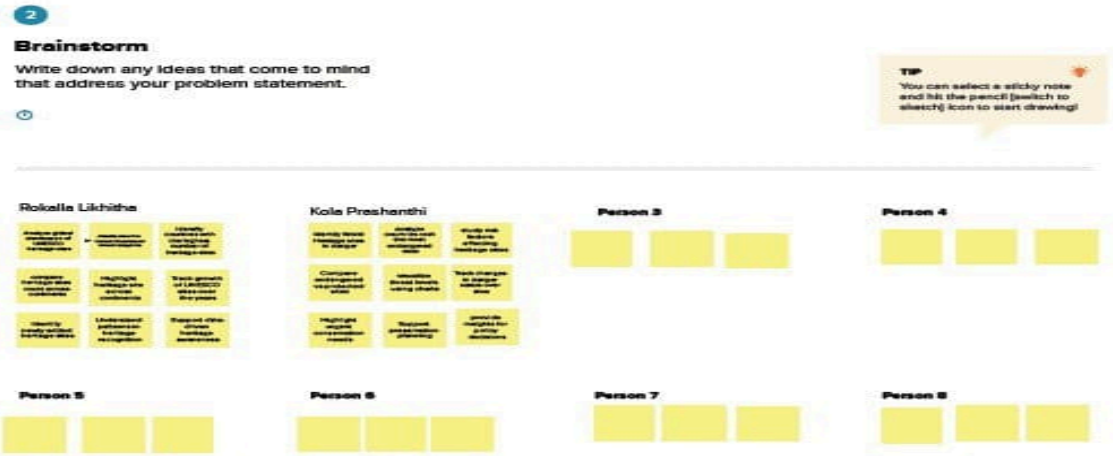
Grouping of Ideas:

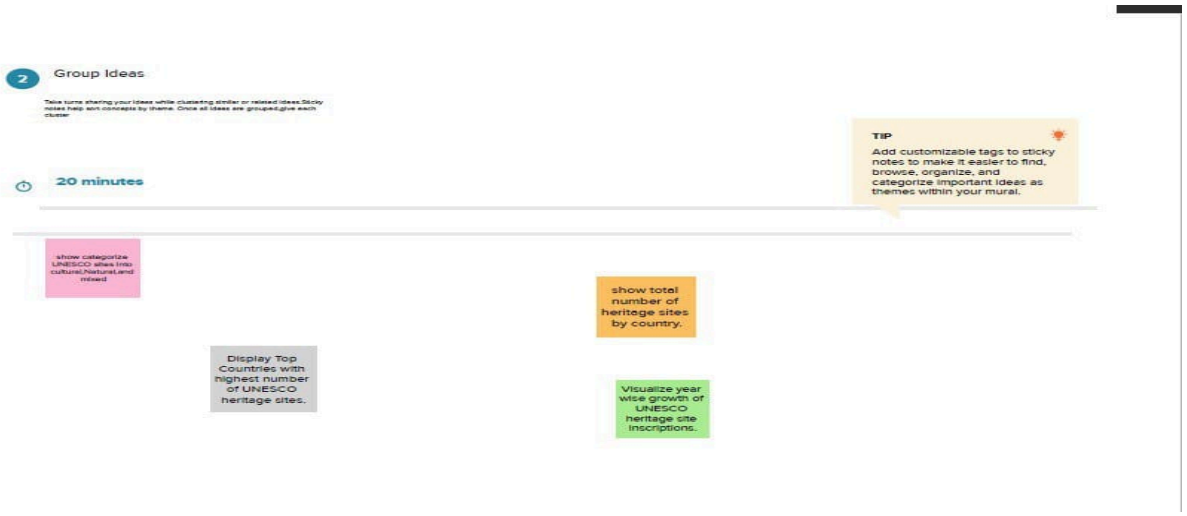
Location Analysis: Map, country-wise, region-wise

Category Analysis: Cultural, Natural, Mixed

Status Analysis: Endangered heritage sites

Trend Analysis: Year-wise growth





Step-3: Idea Prioritization

In this step, our team reviewed all the ideas from the brainstorming session. We discussed which ideas are easy to create and which give useful information for the Heritage Treasures project.

We selected the best idea based on data availability and clear visualization using Tableau.

Finally, we decided to create a dashboard that shows the distribution, categories, and endangered status of **UNESCO World Heritage Sites. This idea helps people easily understand the importance of heritage sites.

1

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are affeer feasible.
