IDEATION PHASE

Define the Problem Statements :

Date	24 February 2026
Team ID	LTVIP2026TMIDS36517
Project Name	heritage treasures: an in-depth analysis of unesco world heritage sites in tableau
Marks	2 Marks

Customer Problem Statements :

Problem Statement (PS-1) :

I am a tourist and heritage explorer trying to find important UNESCO World Heritage Sites and understand their history and significance. I need clear and organized information about locations, categories, and current conditions of these sites. But I find it difficult to gather insights from scattered websites and reports because the information is not visually organized. Which makes me feel confused while planning visits and learning about heritage places.

Problem Statement (PS-2) :

I am a heritage researcher / student trying to analyze the distribution of heritage sites across regions and identify endangered locations. I want to compare regions, site types, and risk levels. But the available data is large and difficult to analyze in raw tables and documents. Because of this, it becomes hard to identify patterns and important insights. Which makes me feel less efficient in understanding heritage trends.

Representations :

problem statement (PS-1)

1	2	3	4	5
I am	I'm trying to	But	Because	Which makes me feel
Tourist	Find important UNESCO Heritage Sites and learn their history	Information is scattered across many sources	Data is not organized or visually presented	Confused while planning visits and understanding heritage sites

problem statement (PS-2)

1	2	3	4	5
I am	I'm trying to	But	Because	Which makes me feel
Student	Analyze heritage sites by region and risk level	It is difficult to study patterns from raw datasets	The data is large and complex	Less efficient in analyzing heritage information

Problem statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes feel
PS-1	Tourist	Find important UNESCO Heritage Sites and learn their history	Information is scattered across many sources	Data is not organized or visually presented	Confused while planning visits and understanding heritage sites
PS-2	Student	Analyze heritage sites by region and risk level	It is difficult to study patterns from raw datasets	The data is large and complex	Less efficient in analyzing heritage information
