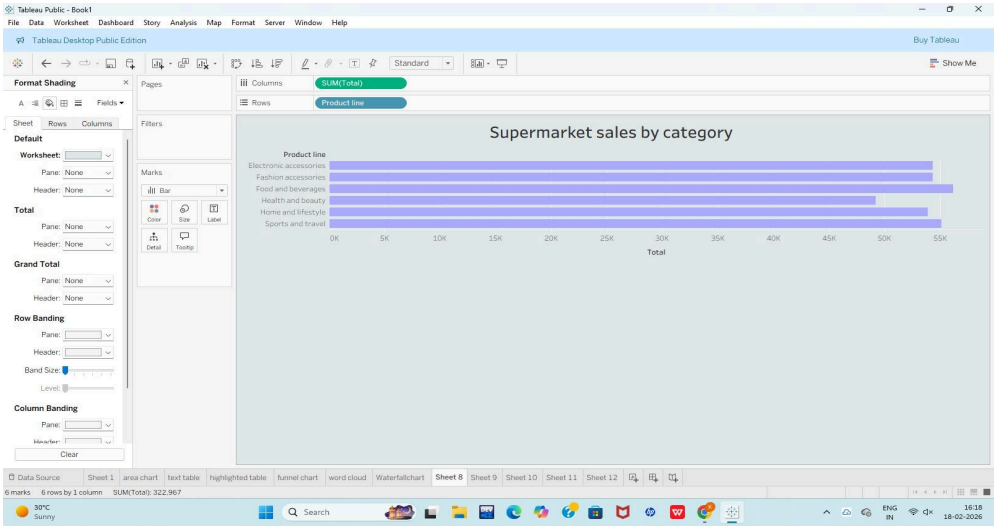
Assignment -1

Bar chat

Purpose:To analyze and compare total sales across different supermarket product categories.

Step-by-step process (alternative method):

1. Open Tableau and load the supermarket dataset.
2. Create a new worksheet.
3. Drag Product line to the Rows shelf.
4. Drag Sales/Total to the Columns shelf.
5. Click on Show Me and select the Horizontal Bar Chart option.
6. Sort the bars in descending order by clicking the sort icon.
7. Drag Sales/Total to the Label option in the Marks card to display values.
8. Edit the chart title and adjust formatting (colors, shading, gridlines) as required.



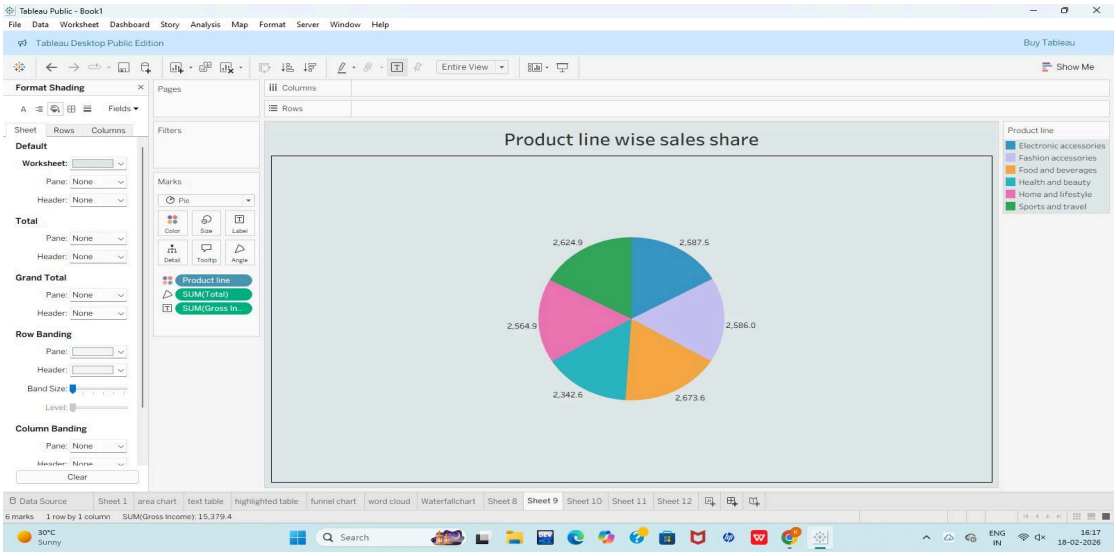
Pie chart

Purpose:To show the sales share of each product line using a pie chart.

To compare the percentage contribution of each category to total sales.

Step-by-step process:

1. Open Tableau and connect to the supermarket dataset.
2. Create a new worksheet.
3. Change the Marks type to Pie.
4. Drag Product line to the Color shelf.
5. Drag Total (Sales) to the Angle shelf.
6. Drag Total (Sales) to the Label shelf to display values.
7. Click on Label and select Show mark labels.
8. Edit the chart title (e.g., “Product line wise sales share”) and adjust formatting as needed.

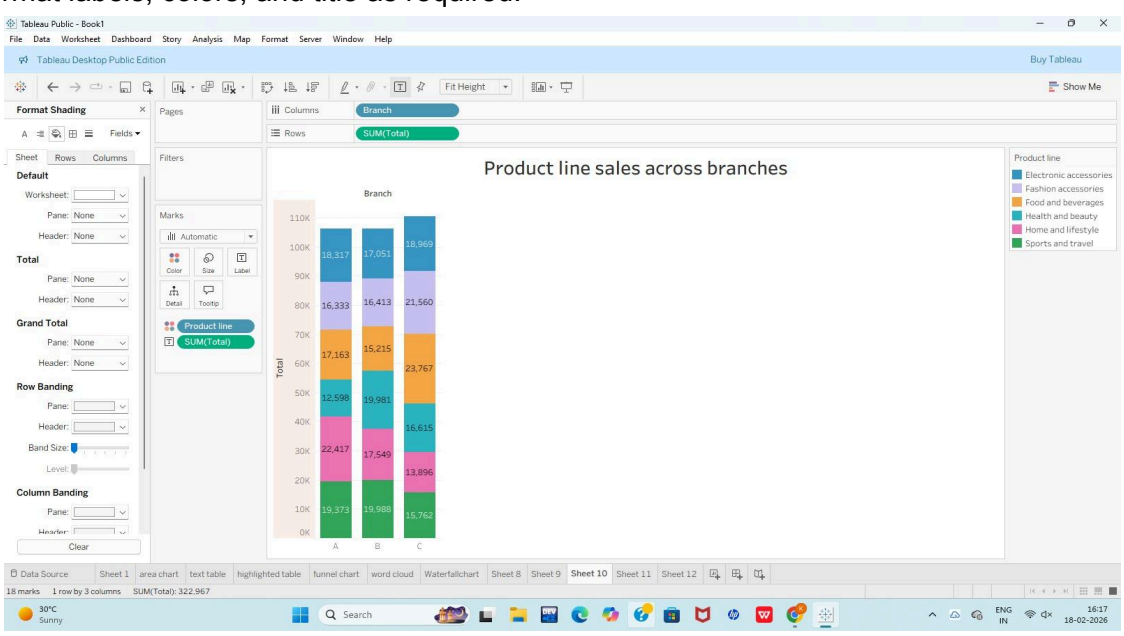


Staked bar chart

Purpose:To examine how each product category contributes to total sales in every branch. To identify the highest-performing branch and product combination.

Step-by-step process (alternative method):

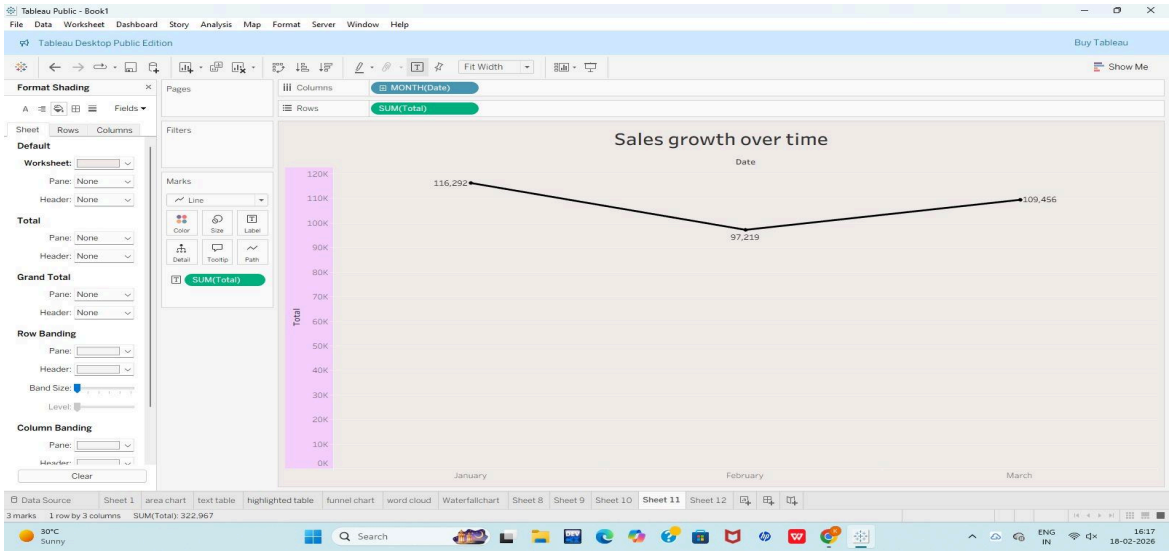
1. Open Tableau and load the supermarket dataset.
2. Drag Total (Sales) to the Rows shelf.
3. Drag Branch to the Columns shelf.
4. Click Show Me and choose the Stacked Bar Chart option.
5. Drag Product line to the Color shelf.
6. Drag Product line to the Label shelf if category names are needed.
7. Click on the Sort icon to arrange branches by total sales.
8. Format labels, colors, and title as required.



Purpose: To analyze sales growth over different months.
To identify trends and changes in total sales over time.

Step-by-step process:

1. Open Tableau and connect to the dataset.
2. Create a new worksheet.
3. Drag **Date** to the Columns shelf and change it to **Month**.
4. Drag **Total (Sales)** to the Rows shelf.
5. Change the Marks type to **Line**.
6. Drag **Total (Sales)** to the **Label** shelf to display values.
7. Adjust the view to **Fit Width** for better visibility.
8. Add the title (e.g., “Sales growth over time”) and format as needed.



Bubble chart
Purpose (2 lines only):
This bubble chart visualizes total sales performance by product line.
It helps compare sales amounts quickly using bubble size and color intensity.

Step-by-step process in Tableau:

1. Open Tableau and connect to your dataset.
2. Go to a new worksheet.
3. Drag Product line to the Marks card → drop it on Detail.
4. Drag Total (Sales) to Size on the Marks card.
5. Drag Total (Sales) again to Color.
6. Drag Total (Sales) to Label to display values inside bubbles.
7. Change the Marks type to Circle (if not already selected).
8. Adjust size and formatting, then add a title (e.g., “Sales Performance”).
9. Use Show Me → Packed Bubbles (optional shortcut method).
