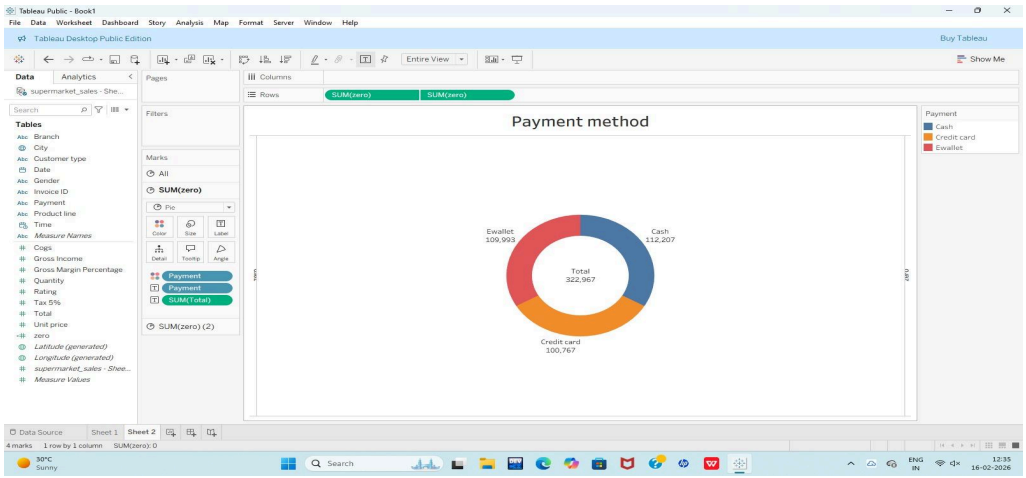
Assignment -2

- **Dount char**

Purpose: To analyze which payment method is most preferred by customers.
To understand the percentage share of each payment type in total sales

Step-by-step process:

1. Open Tableau and load the dataset.
2. Drag Total (Sales) to the Rows shelf.
3. Click Show Me and select the Pie Chart option.
4. Drag Payment to the Color shelf in the Marks card.
5. Drag Payment to the Label shelf.6. Drag Total (Sales) to the Angle shelf.
7. Right-click Total (Sales) on Label → choose Quick Table Calculation → Percent of Total.
8. Format labels, adjust size, and edit the chart title as required.

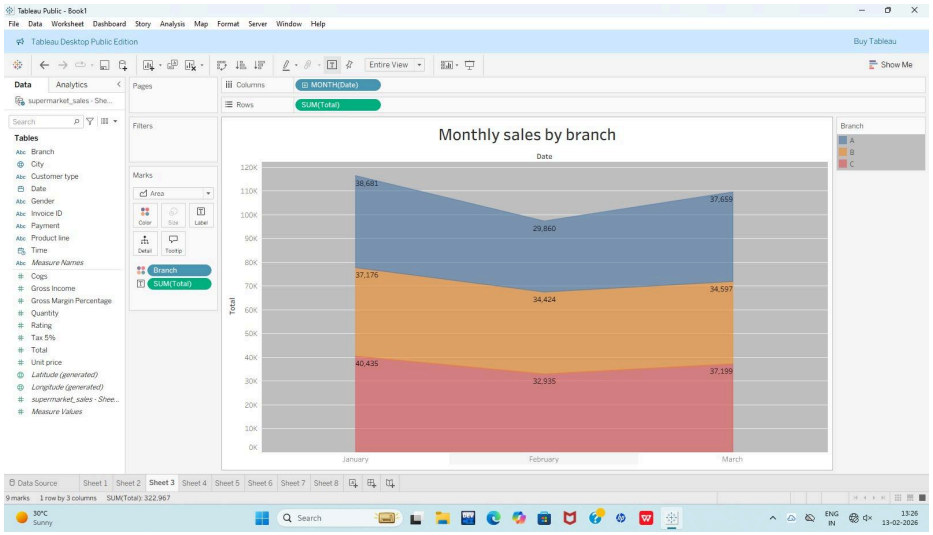


- **Area chart**

Purpose: To visualize monthly sales performance for each branch.
To compare sales trends of branches A, B, and C over time.

Step-by-step process:

1. Open Tableau and connect to the dataset.
2. Create a new worksheet.
3. Drag Date to the Columns shelf and change it to Month.
4. Drag Total (Sales) to the Rows shelf.
5. Change the Marks type to Area.
6. Drag Branch to the Color shelf to create a stacked area chart.
7. Drag Total (Sales) to the Label shelf if values are needed.
8. Edit the chart title (e.g., “Monthly sales by branch”) and format as required.

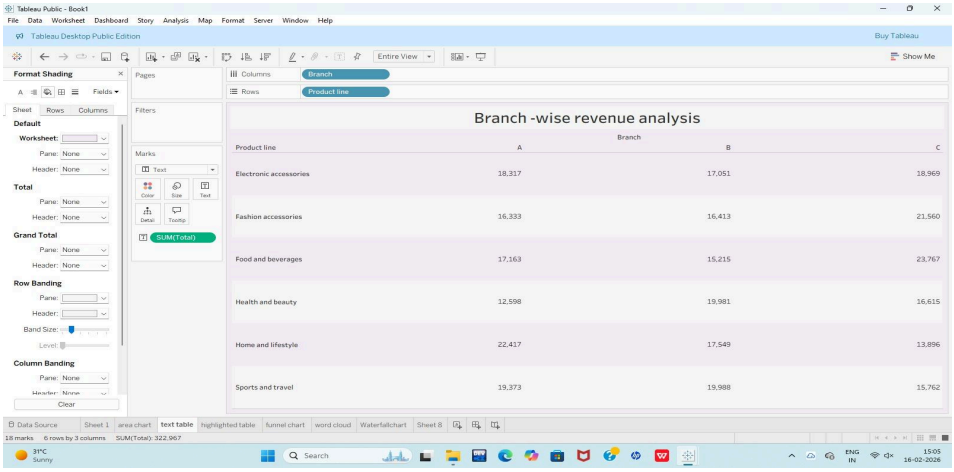


- **Text table**

Purpose: To display branch-wise revenue for each product line in a text table format.
To compare sales values across branches A, B, and C clearly.

Step-by-step process:

1. Open Tableau and connect to the supermarket dataset.
2. Create a new worksheet.
3. Drag Product line to the Rows shelf.
4. Drag Branch to the Columns shelf.
5. Drag Total (Sales) to the Text option in the Marks card.
6. Ensure the Marks type is set to Text (Text Table).
7. Format numbers (currency format) and adjust alignment.
8. Add the title (e.g., “Branch-wise revenue analysis”) and apply shading if needed.



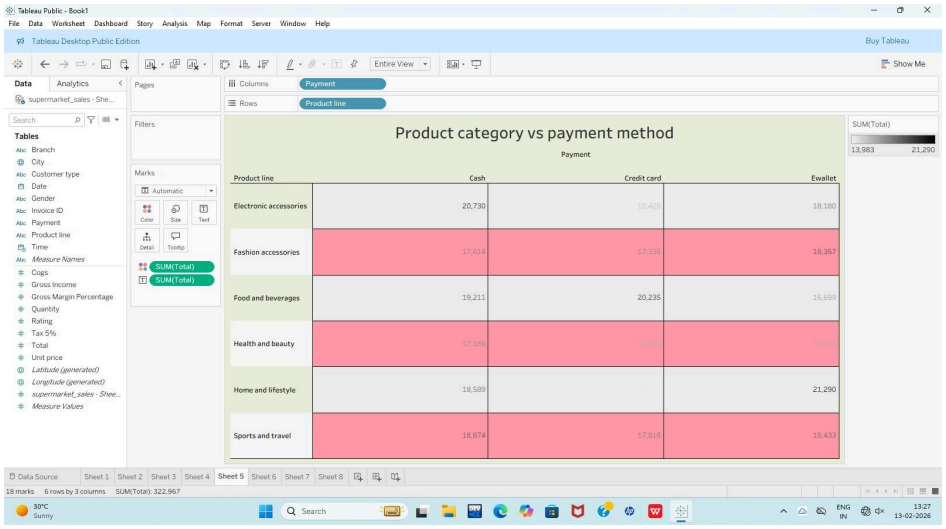
- **Highlighted Table**

Purpose: To compare product category sales across different payment methods.
To identify which payment type is most used for each product line.

Step-by-step process:

1. Open Tableau and connect to the supermarket dataset.
2. Create a new worksheet.

3. Drag Product line to the Rows shelf.
4. Drag Payment to the Columns shelf.
5. Drag Total (Sales) to the Text shelf in the Marks card.
6. Drag Total (Sales) again to the Color shelf to create a highlight table.
7. Choose a suitable color palette from the Color option.
8. Add the title (e.g., “Product category vs payment method”) and format as required.

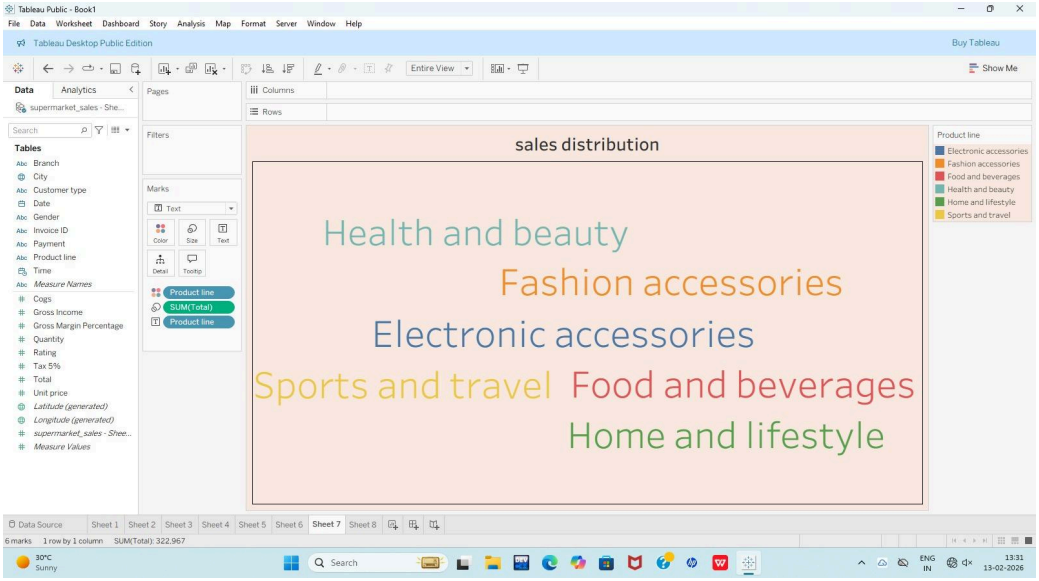


- **Word could**

Purpose: To visualize sales distribution across different product lines.
To compare which product category generates higher total sales.

Step-by-step process:

1. Open Tableau and connect to the dataset.
2. Drag Product line to the Marks → Text shelf.
3. Drag SUM(Total) to the Size shelf.
4. Drag Product line again to the Color shelf.
5. From Show Me, select Packed Bubbles (or adjust mark type to Text for word view).
6. Increase the size slider to enlarge the text.
7. Edit the title as “Sales Distribution” and format the background if needed.

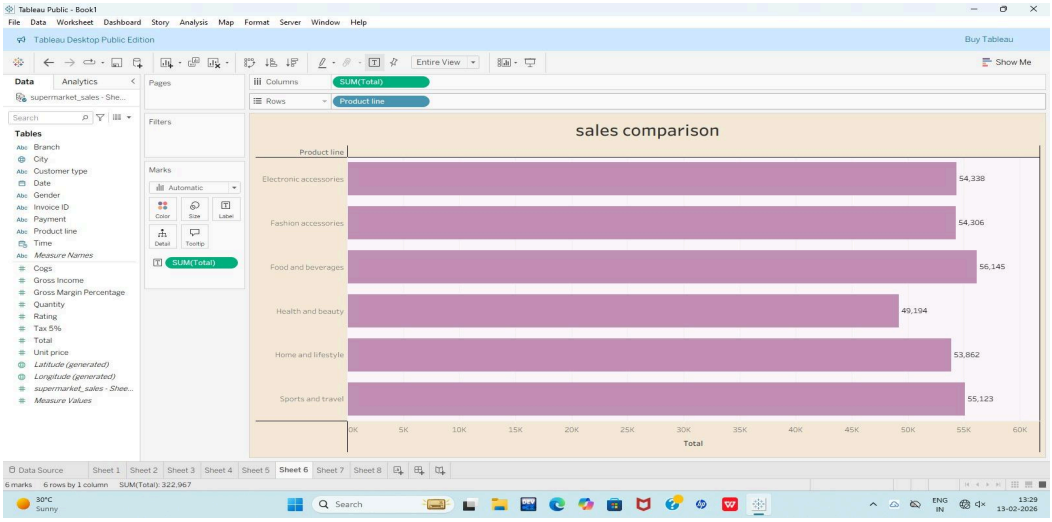


- **funnel chart**

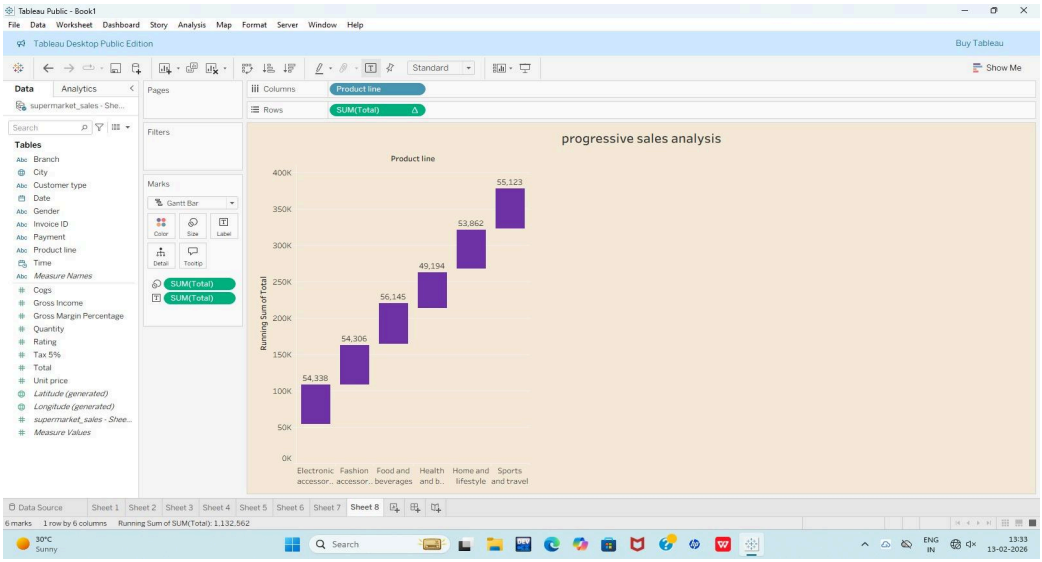
Purpose: To compare total sales across different product lines.
To identify which product category has the highest and lowest sales.

Step-by-step process:

1. Open Tableau and connect to the dataset.
2. Drag Product line to the Rows shelf.
3. Drag SUM(Total) to the Columns shelf.
4. Ensure the mark type is set to Bar.
5. Drag SUM(Total) to the Label shelf to display values.
6. Sort the bars in descending order by clicking the sort icon.
7. Edit the title as “Sales Comparison” and format the chart if needed.



Water fall chart

Purpose: To analyze the cumulative (running total) sales across product lines.
To understand how each category contributes to overall sales growth.
Step-by-step process:


1. Open Tableau and connect to the dataset.
2. Drag Product line to the Columns shelf.
3. Drag SUM(Total) to the Rows shelf.
4. Right-click SUM(Total) on Rows → select Quick Table Calculation → Running Total.
5. Change the Marks type to Gantt Bar.
6. Drag SUM(Total) again to the Size shelf.
7. Drag SUM(Total) to the Label shelf to show values.
8. Edit the title as “Progressive Sales Analysis” and format as needed.
